153UB Insulated Standard Bag Testing Report

Results

- Performance was 66% better inside the 153UB Insulated Standard Bag.
- The 153UB Insulated Standard Bag kept the product at a more constant temperature compared to the temperature loss outside the bag.
- 17.7°F degrees lost inside 153UB Insulated Standard Bag compared to 29.4°F lost outside the bag.

Scope

We tested the change in temperature of a 3-gallon tub of ice cream in an ambient environment against the change of temperature of the ice cream while stored inside the 153UB Insulated Standard Bag. The 153UB Insulated Standard Bag did not have dry ice in it. Using temperature-monitoring probes we charted the temperature every hour for 9 hours and discovered that performance was 66% better inside the 153UB Insulated Standard Bag.
