154DC Hand Truck Pouch Testing Report

Results

- The 154DC Hand Truck Pouch was able to hold 24 standard bricks, weighing 5.1 pounds each, for a total weight of 122.4 pounds.

Scope

We tested the amount of weight that the 154DC Hand Truck Pouch could hold before it would rip, tear or come off of the hand truck. We measured this by adding one brick at a time to the hand truck pouch. Each brick weighed 5.1 pounds. In the end we were able to put 24 bricks stacked in the bag, which weighed 122.4 pounds. We actually ran out of bricks and the pouch never separated from the hand truck or ripped. We concluded the 154DC Hand Truck Pouch would be able to hold more weight since testing was stopped at 24 bricks.
